

**SOCIAL STUDIES:** Our Social Studies program integrates the teaching of geography, history, current events, political science, sociology, anthropology, and economics. Students are provided with basic knowledge and understanding of the geographical impact on a country and its history. Issues, past and present, local, national, and global are discussed as age dictates, and students become aware of cultures other than their own. It is our hope that the knowledge they gain in these subjects helps them to make informed decisions as they assume the responsibility of being citizens in this diverse world.

**Overview:** across the grade levels, introduces, refines, and masters the following:

- Five Themes of Geography: Location, Place, Human/Environment Interaction, Movement, Regions.
